How to change the original language of the audio transcript

By default, audio transcripts for cloud recordings are generated in English, but the default language can be chosen for a recording and have the transcript regenerated.

1. Sign in to the Zoom web portal.
2. In the navigation menu, click [Recordings](#).
3. Click the name of the recorded meeting. You will see a list of [recording files](#).
4. Hover your cursor over the Audio transcript file and click **Change Language**.
5. Click the dropdown menu and select from the available languages.
6. Click **Save** to begin generating the audio transcript with that as the speaking language within that recording. Zoom will re-analyze the recorded audio with the newly chosen speaking language to provide a better quality transcription.
